

# Intellian® t80W 85cm Ku-band 3-axis Global Satellite TV Antenna Systems

**Intellian® t80W** is the world's first marine satellite TV antenna system that truly works with any Ku-band satellite TV service around the globe without requiring LNBS to be swapped out or re-wiring the system when the vessel travels from region to region.

The fully stabilized, 3-axis t80W is a 85cm(33.5") satellite TV antenna system that is exclusively designed to support viewing all Standard Definition (SD) and HD programming broadcast through both DVB and the latest DVB-S2 satellite TV service standards.

Integrated with the exclusive, patented, groundbreaking WorldView™ LNB module and Intellian's exclusive pre-programmed Global satellite library, the t80W allows you to tune into any channel on any satellite by simply pushing the button on your remote control. The t80W will automatically switch between circular polarized programming in North, Central and South Americas, and linear polarized programming in Europe, the Middle East, and the Asia Pacific region.

Built with Intellian's extremely high vibration and shock standards, the t80W's simplified yet sophisticated mechanical design is capable of withstanding the most severe marine environment and is guaranteed to track and lock onto the satellite signal instantly in all weather conditions.
