QUANTUM Series PD60L

L-band Satellite Modem

DVB S2

OVERVIEW

The low-cost **QUANTUM Series PD60L** combines the *bandwidth saving* and *robustness* benefits of **DVB-S2** with traditional SCPC services such as TPC and FastLink Low-Latency LDPC - **in one modem**. This allows the modem to provide a highly-efficient large DVB-S2 outbound and a small SCPC low-latency return, for example.

In addition, **Paired Carrier™** overlays transmit and receive carriers reducing satellite bandwidth by up to 50%. Paired Carrier™ uses ViaSat's patented PCMA technology.

FEATURES

- Data rate options to 100Mbps, 40Msps.
- All the standard features and options of the Evolution Series Modem including IBS, IDR, Drop & Insert, etc.
- DVB-S2 FEC and modulation support.
- Paired Carrier™ option.
- A wide range of terrestrial interfaces including Ethernet, serial and G.703.
- Advanced IP feature set including TCP acceleration, compression, routing, bridging, traffic shaping, ACM, encryption and throughput/diagnostic graphs.
- **New!** Patent-pending **LinkGuard™** signal-under-carrier interference detection.

SCPC features, DVB-S2 Space Segment

QUANTUM modems are fully backward compatible with Paradise Evolution modems when DVB-S2 is disabled.

Modes of operation:

- DVB-S2 outbound with SCPC return, or SCPC outbound with DVB-S2 return.
