Global Communications Solutions

Technology at work for you

Connecting your business to the technology resources you need

For over 20 years, Digisat International, Inc. has been a worldwide leader in delivering total global communications solutions, services, and support for satellite, wireless, video, and IP networks. We support a constant evolving and diverse group of clients around the world consisting of broadcasters, governmental agencies, defense contractors, teleport operators, media firms, enterprise organizations, maritime companies, oil and gas producers, mine operators, equipment manufacturers, scientific research teams and humanitarian organizations.

Our global communications services provide clients with expert cutting edge technical solutions for Systems Integration, Engineering, Installation, Maintenance, Lifecycle Support, Equipment Procurement, Network and Internet Connectivity, and Network Management Services. Digisat International, Inc.'s proven communications solutions and support, enable seamless global communications, content delivery and internet connectivity anywhere, anytime.

GLOBAL SUPPORT PERSONNEL

Our Communications Systems support personnel include SATCOM Engineers, System Administrators, Network Engineers, Logisticians, as well as several others. We pride ourselves on delivering highly skilled personnel that provide the full spectrum of field service support for both fixed and mobile communication solutions.

We are confident that our professionals' unwavering integrity and reliability is the key to your program success. While maintaining constant communication with our clients enables timely responses that are cost effective. Our commitment to the critical needs of our clients exceed industry standards.

INSTALLATION SERVICES

SATELLITE, VIDEO, NETWORKING, AND IP

Our professional team of highly experienced field engineers, installation technicians and program managers offer flexible turnkey communications equipment installation services for satcom, video, telecom, troposcatter, mobile, wireless, and IP networking applications. Our installation services encompass all vertical markets and cover an extensive range of communications equipment manufacturers.

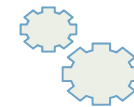

SYSTEMS DESIGN AND INTEGRATION

RAPID DEPLOYMENT, FIELD PROVEN SOLUTIONS

Our senior engineers and systems integration technicians enable you to rapidly deploy, setup, and commission your communications network systems anywhere in the world. From "hard to reach" places to metro areas, Digisat International, Inc. retains the utmost versatility to respond to your long term or "just in time" integration requirements.

flexible solutions for all of your technical needs...

Total Turnkey & Custom End-to-End Solutions

ENTERPRISE

Our products and customized systems are used to deliver complete connectivity solutions for your remote offices and offsite project locations around the world.

We provide training and technical consulting services to assist organizations with implementing and operating today's rapidly evolving communications systems and hardware.

MEDIA

Our media network services enable the efficient delivery of video contribution and video distribution services to clients around the globe. Our turnkey portfolio of services and solutions are designed to provide increased network reliability, streamline daily operations, and increase revenue.

Our experts provide versatile knowledge and manpower for setting up satellite time, encoders, modulators, high power amplifiers and uplink trucks.

GOVERNMENT

Digisat's government services provide total communications solutions to local, state, and federal government agencies around the globe.

Our reliable and secure solutions deliver fully integrated satellite communications systems, engineering services and network life-cycle services for your mission critical requirements.

MOBILE

Our mobile satellite communications solutions are designed to keep you connected anywhere on earth. From mobile satellite news gathering and emergency communications, to video streaming and vehicle satellite internet systems, our professionals are ready to solve your unique connectivity challenges.

Our sales team will work with you to devise a reliable and cost effective custom solution tailored to your unique application.

MARITIME

Across all seven seas, our maritime communications solutions enable the delivery of high speed satellite broadband internet, HDTV, data, voice, and video services to vessels and offshore oil and gas platforms.

Our deep offshore communications experience coupled with our strong satellite knowledge, provides our maritime clients with access to a vast array of cost effective and reliable marine communications solutions. From antenna system installation and commissioning, to ongoing maintenance services, Digisat International, Inc. provides total solutions.

Whether you're operating a fleet of container ships, conducting business from your yacht in exotic waters, or providing marine law enforcement, Digisat International, Inc. is ready to deliver a reliable and cost efficient maritime solution that's tailored to your unique requirements.
