

Evolution eM1D1 Line Card Models eM1D1, eM1D1-FIPSL2

eM1D1 shown

The Evolution eM1D1 line card is suited for supporting secure voice, data, and video communication links for mission-critical military and COTM broadband applications operating in either DVB-S2/ACM or iNFINITI TDM mode on the outbound. It supports TDMA or SCPC Return* with optional Spread Spectrum and extremely efficient FEC with 2D 16-State coding on the inbound. The line card features one modulator and one demodulator and is designed to meet the guidelines of MIL-STD 810F for operation in harsh environments.
